

5 Courses

Introduction to Front-End Development

HTML and CSS in depth

Programming in Python

Introduction to Databases for Back-End Development

Django Web Framework

Mar 26, 2026

Laraib

has successfully completed the online Specialization

Meta Web Development Fundamentals

Congratulations on completing the Meta Web Development Fundamentals Specialization! This certificate recognizes your hard work in learning essential web development skills. Please feel free to share it with your professional network. Throughout the program, you've watched instructional videos, completed assessments, and tackled hands-on exercises to build your web development skills from the ground up. You've built websites with HTML/CSS, adding interactivity with JavaScript, and writing clean Python code using object-oriented principles. You've also developed server applications with Django and learned effective collaboration using Git and GitHub for version control. With these foundational skills, you're well-equipped to continue your journey in web development!

Taught by Meta Staff

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
